Telephone keys

Telephone configuration

Note: Immediately change the following factory settings.

Speaker volume level adjustment

You can adjust the speaker volume level to high, middle, low using the switch on the right side of your telephone.

Ringer volume level

The phone will ring when there is an incoming call. You can set the ringer volume to high, middle or low level. The ringer volume switch is indicated in the following illustration under A.

Pulse tone setting

You can select P (PULSE) or T (TONE) dialing mode according to the requirements from the local telephone operator. The T/P switch is indicated in the following illustration under B.

2

Flash time setting

You can use the Flash feature to access services provided by your telephone operator. The Flash time is dependent on the local telephone exchange. You can change the setting using the switch indicated in the following illustration under C.

- A - Ringer Volume Switch
- B - Tone/Pulse Switch
- C - Flash Time Switch
