EACOME

S350

Benefits of Upgrading to the Newest Generation

Experience a new generation of voice conferencing

EACOME® now offers a suite of conference phones specifically designed for different types of rooms and network environments. These include:

- Conference phones designed to meet the acoustic requirements of different types of rooms, such as the EACOME® S350 solution for larger conference rooms, and EACOME® S300 phone for smaller meeting rooms and executive offices.

- Models designed for analog, PABX, and VoIP environments, with unique features that take advantage of the benefits provided by the different types of telephony environments, such as S series for analog, S310 for a PC and Laptop, IP6000 for VoIP environment.

- The IP3000 conference phone for the broadest telephony platform and room-coverage options-including both analog and IP connectivity to deliver unbeatable investment protection.

- The S350 conference phone dedicated the most values for both analog and USB connectivity to deliver unbeatable investment protection.

- The S310 conference phone designed to enhance audio quality for video conference with USB or Line in/out connection.
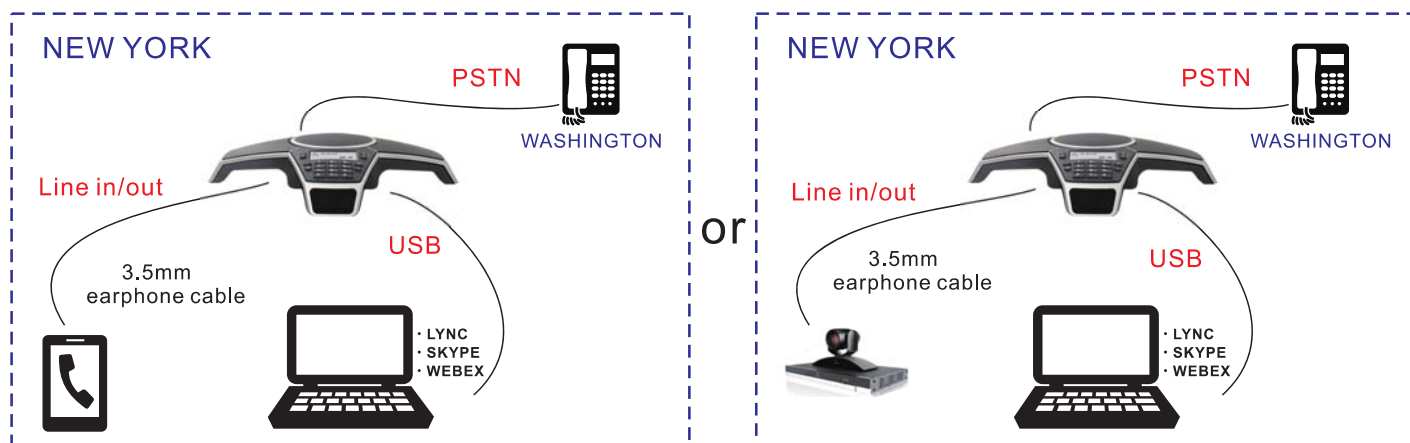

Benefits

- **Create a more realistic experience**, with select models using EACOME® HD- Voice technology SonicClear to capture both the deeper lows and higher frequencies of the human voice, resulting in conference calls that sound as natural as being there

- **Extend the microphone range**, ensuring that everyone in the room is heard loud and clear on the other end of the call

- **Actively remove background noise,** emanating from sources such as projectors and ventilation systems

- **Highlight the person speaking,** using smart microphones that focus on the speaker—not the distracting ambient sounds

- **Resist interference from mobile phones,**and other wireless devices, to deliver clear communications with no distractions

- **Make users more productive immediately,** because all EACOME conference phones share the same, proven ease of use
